

Product benefits

- The ultimate feed to reveal your koi's true beauty
- Contains BIO-MOS® for improved health and vitality
- Added prebiotic fiber supports natural probiotic bacteria (*Lactobacillus* and *Bifidobacterium*)
- Minimises faeces and water pollution
- Backed by extensive koi nutrition research
- A complete koi diet

Ideal mix of two types of pellets:

- Growth:
 - An ideal ratio of protein, fat and starch
 - Balanced amino acids for optimal growth and muscle development
- Colour:
 - Contains astaxanthin to boost red colouration
 - Includes natural spirulina, rich in zeaxanthin, to enhance yellow and orange pigmentation

**Available in 2.5-mm and 5-mm pellets
packed in 4-kg and 9-kg bags**

**Advice: Koi < 20cm: 2.5-mm
and Koi > 20cm: 5.0-mm**

**The Grand Champion
family of feeds**

**Crafted for winners.
Zero compromise.**

Our unique feed advantages

- ✓ Scientifically proven and RAS-optimised
- ✓ Sustainably sourced ingredients and locally produced in Europe
- ✓ Advanced additives including Bio-Mos®, Actigen®, Bioplex® and the Aquate™ premix
- ✓ Highly digestible, minimises faeces and water pollution
- ✓ Complete nutrition from entry-level to ultimate growth and colour enhancement
- ✓ Blend of herbs that combat gill worms (Growth & Colour only)

Combatting Gill Worms

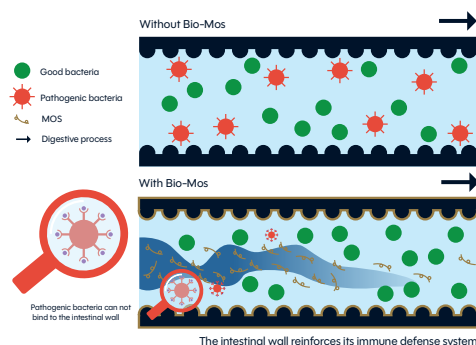

Our unique immune-boosting blends are specially formulated to combat gill worms and support overall koi health and robustness.

Advanced additives

The Grand Champion feed range includes various advanced additives. Each additive is designed to support koi health, growth, and vitality:

- **BIO-MOS®** and **Actigen®** are yeast-based ingredients that support the gut and immune system, improve nutrient absorption, and strengthen the mucous barrier – your koi's first line of defense against parasites and pathogens
- **Bioplex®** provides highly bioavailable organic minerals (zinc, copper, manganese, iron) that support growth, reduce environmental impact, and improve overall performance

Functioning of Bio-Mos

- **Aquate™**, a proprietary premix, combines these technologies to optimise digestion, immunity, and resilience across all life stages

Analytical constituents

Crude protein	48.0%
Crude fat	10.0%
Crude fibre	1.6%
Crude ash	9.3%
Starch	14.7%
Phosphorus	1.56%
Calcium	1.4%
Sodium	0.3%

Composition

Fish meal; horse beans, dehulled; wheat gluten; guar germ meal; barley protein feed; wheat germ; rape lecithin; fish oil; wheat; monocalcium phosphate; yeast products (4 g/kg); turmeric; krill meal; red rice powder; beetroot powder; spirulina (2.5 g/kg); inulin (2.5 g/kg); algae (*Schizochytrium limacinum*).

Additives

Vitamins: Vitamin A — 16,666 IU/kg; vitamin D3 — 1,829 IU/kg. Trace elements: Iron (II) (chelate of protein hydrolysates) — 300 mg/kg; iodine (calcium iodate, anhydrous) — 7 mg/kg; copper (II) (chelate of protein hydrolysates) — 7 mg/kg; manganese (chelate of protein hydrolysates) — 30.8 mg/kg; zinc (chelate of protein hydrolysates) — 83.6 mg/kg. Colourants: Astaxanthin — 20 mg/kg. Binders: Bentonite — 1,000 mg/kg. Contains preservatives and antioxidants. Contains fish meal. Do not feed to ruminant animals.
